mariamfatima486@gmail.com

Karachi, Pakistan.

TECHNICAL SKILLS

PROGRAMMING LANGUAGES

- C
- C++
- Java
- Python
- HTML , CSS
- JavaScript
- SQL

DEVELOPMENT TOOLS

- VS Code
- Git & GitHub
- MySQL
- Microsoft Office

DESIGN TOOLS

- Figma
- Adobe Illustrator
- Canva

LANGUAGES

- English
- Urdu

PROFESSIONAL SUMMARY

Passionate Software Engineering student with a strong foundation in software development, programming, and UI/UX design. Proficient in C, C++, Java, Python, HTML, CSS, JavaScript, and SQL, with experience in building academic and personal projects. I enjoy combining technical expertise with creativity to build solutions that are both functional and visually appealing. As an active member of GDGoC and MLSC, I collaborate in technical communities, design impactful content, and continuously learn new technologies to grow as a well-rounded professional.

WORK EXPERIENCE

Google Developers Group on Campus (GDGoC)

Designer

Nov 2025 – Present

- Designed promotional graphics for technical workshops and events.
- Created social media posts, banners, certificates, and event branding.
- Collaborated with organizers to maintain consistent visual identity and branding.

Microsoft Learn Student Community (MLSC)

Core Team Member & Designer

Jan 2025 – Nov 2025

- Designed creative marketing material for technical events and initiatives.
- Collaborated with team members to organize workshops and community activities.
- Supported branding initiatives across multiple university events.

EDUCATION

DHA Suffa University

2024 – 2028

Bachelor of Science in Software Engineering

Relevant Coursework:

Object-Oriented Programming

Data Structures & Algorithms

Database Systems

Computer Networks

Operating Systems

Software Engineering

Information Security

PROJECTS

Arena 456

Frontend Developer & UX Designer

Built an interactive web application with immersive visuals and dynamic features.

- Developed using React, JavaScript, HTML, and CSS.
 - Designed responsive UI/UX for smooth user experience.
 - Focused on performance optimization and clean, scalable code.
-

Safe Route

Software Engineering Project

- Prepared Software Requirement Specification (SRS).
 - Designed Use Case Diagrams.
 - Created Functional & Non-functional Requirements.
 - Focused on UI planning and system analysis.
-

Crypto Encryption System

Information Security Project

- Implemented classical encryption algorithms.
 - Developed secure encryption and decryption techniques.
 - Explored cybersecurity concepts and cryptographic methods.
-

Personal Portfolio Website

Developer & UI/UX designer

- Designed and developed a responsive personal portfolio.
 - Showcased projects, certifications, and technical skills.
 - Integrated modern UI design principles.
-

CERTIFICATIONS

Google HashCode'25

Google Hash Code 2025 – Participant

Participated in Google Developer Group on Campus team programming competition, solving real world algorithmic and optimization challenges while strengthening problem solving, teamwork, and coding skills.

Robofest'25

Robofest 2025 – Python Programming Judge

Served as a Judge for the Python Beginner Programming competition category at Robofest 2025, evaluating student projects on innovation, technical implementation, logical thinking, and functionality.

Crash Course on Python

Crash Course on Python – Google

Completed Google's Crash Course on Python, covering Python fundamentals including variables, functions, loops, conditionals, data structures, file handling, and automation through hands-on programming exercises.
